Synapse RF Engine - ZigBee Radio Board (RFE)

Not Amplified - Standard Range

The Synapse RF Engine™ is an all-in-one solution to your embedded wireless control and monitoring network needs. Just plug it in and send and receive data through the built in serial port. The RF Engine will take the serial data and send it over a self-forming wireless network using the ZigBee® physical layer (802.15.4)

The RF Engine contains a microcontroller, a ZigBee modem, the SNAP network software as well as amplifiers, matching networks and is FCC certified. With this "engine" handling the RF hardware and software, **you can focus on your application, not the network**.

Synapse offers RF Engines in numerous configurations and can customize one to meet your needs.

- ✔ SNAP self-forming wireless network software preinstalled
- ✔ Communicate using simple serial AT commands
- ✔ Coordinator or End Device versions
- ✔ Embedded F antenna
- ✔ 10dB receive amplifier standard
- ✔ Consumes as little as 47 µA in operation
- ✔ Eight 10-bit A/D (or digital I/O) plus 5 digital I/O pins
- ✔ Serial interface (logic levels or RS232 levels)
- ✔ 16K, 32K or 60K flash memory available
- ✔ FCC certified all 16 channels
