Intel® PRO/100 S Desktop Adapter

Fast, managed 10/100 connections with accelerated LAN security

Network Speed and Security

The Intel® PRO/100 S Desktop Adapter represents the next generation of Fast Ethernet desktop connections. Maintain high performance on managed PC networks while offering accelerated LAN security to preserve performance on IPSec-enabled networks. The Intel PRO/100 S Desktop Adapter is designed for Windows* 2000 networks running IPSec, but is flexible enough to run in Windows 98 and Windows NT* environments using Intel® Packet Protect II software. The Intel PRO/100 S Desktop Adapter is a member of the industry's first complete family of security adapters that protect data for all of your systems without sacrificing performance – mobile, server, and desktop.

Ease of Management

The Intel PRO/100 S Desktop Adapter supports the latest Wired for Management (WfM) specification to work with PC management applications from the leading software vendors. Advanced management features, such as Wake on LAN* and Intel® Boot Agent, help reduce IT support costs by providing remote management capabilities.

The Intelligent Way to Connect

Intel® SingleDriver™ technology offers a single suite of drivers for Intel® PRO/100 Network Adapters, adopted by many of the world's leading PC and server suppliers, simplifying installation and maintenance. In addition, these adapters are compatible with all major network operating systems. From Intel SingleDriver technology to standards-based security and management features, Intel® Network Adapters really are *the intelligent way to connect*.

Intel® PRO
Network Connections

- **Integrated security co-processor increases IPSec performance**

- **Advanced management for lower support costs**

- **Intel® SingleDriver™ technology simplifies installation and maintenance**

Features	Benefits
High-performance LAN Security	**Protection and Performance**
■ Encryption Offloading	■ Adapter offloads IPSec encryption/decryption from PC, conserving CPU resources for greater network performance
■ Intel® 82550 Fast Ethernet Controller with Integrated Security Co-processor	■ Combines network functions and encryption offloading into single-chip solution for improved performance and reliability
■ Windows* 2000 Optimization, IPSec Support	■ Improves performance of IPSec functionality in Windows 2000 operating systems through encryption offloading
■ Intel® Packet Protect Software	■ Adds IPSec functionality to Windows NT* and Windows 98 systems
■ 3DES (168 bit) Encryption	■ Provides highest level of encryption widely available for data protection
Advanced Management Capabilities	**Ease IT Administration and Reduce Support Costs**
■ Wired for Management (WfM) 2.0 Enabled	■ Remote management across platforms
■ Wake on LAN* and Desktop Management Interface (DMI) 2.0	■ Remote troubleshooting and asset management
■ Pre-installed Intel® Boot Agent	■ Deploy and upgrade PCs remotely
■ Tivoli* Agents	■ Fast, easy access to management applications
■ ACPI Compliant	■ Reduced power consumption
■ Intel® PROSet II Utility	■ Windows utility for easy setup
Standards-based Networking	**Widespread Compatibility**
■ Intel® SingleDriver™ Technology	■ Common set of drivers across Intel® 10/100 network adapters simplifies setup and maintenance, and decreases driver conflicts among new and legacy systems
■ Supports All Major OSs and NOSs	■ Compatible with your environment as your network evolves
■ Backward Compatible	■ Integrates with existing Intel® network adapters and network-ready PCs with Intel® Fast Ethernet technology
