

IDC-Hybrid terminals with IDC and screw connection IDK 1.5N/ZB

NEW

Weidmuller's latest insulation displacement (IDC) hybrid terminal, IDK 1.5N/ZB, offers a combination of IDC and screw clamp technology in a compact package, which provides OEMs the best of both worlds to capitalize on the time-saving IDC technology, yet continue to provide standard screw clamp technology for field wiring.

Thanks to external tensioning spring to the IDC contacts and a visual positioning of the wire guide, IDC contacts guarantee the best possible contact that is safe and reliable.

IDC technology offers an estimated time savings of up to 76% in comparison to conventional screw clamp methods of connection.

United States

Weidmuller
821 Southlake Blvd.
Richmond, Virginia 23236
