Titanium Tweezer Style 7

**▪ TITANIUM TWEEZER STYLE 7****\$27.80**

For assembly work, hand can rest on bench, curved super fine points. Overall length 4 3/4". Titanium tweezers are advantageous for use in the electronics and science industries due to lack of the shedding of particles-like the stainless steel tweezers. Anytime an abrasive substance is handled and microscopic particles are a detriment, titanium is a good choice. Titanium is non-magnetic therefore is extremely useful when handling magnetic materials, or when working in a magnetic field.
