and two

Hold-up time 20 ms @ 165 W load

Overload protection Short circuit protection on all outputs.

Case overload protected @ 110-145% above peak rating. Latching type

recycle AC to reset.

Overvoltage protection Tracks outputs 1 & 2: 20% to 35%

Logic Control

Standby output

Power failure TTL logic signal goes high 100-500

msec after V1 output; it goes low at least 4 msec before loss of regulation

Remote Inhibit Requires contact closure to inhibit

outputs

Remote sense Compensates for 0.5 V lead drop

minimum, will operate without remote sense connected. Reverse connection

protection.

DC Ok TTL logic signal goes high after main

output is in regulation. It goes low when there is a loss of regulation.
