DM163027-4 - PICDEM-2

The PICDEM™ 2 is the Microchip solution for ZigBee network applications--and each node in the network. It is a ZigBee network coordinator and a ZigBee network node. It is a ZigBee network coordinator and a ZigBee network node. It is a ZigBee network coordinator and a ZigBee network node.

DM183023 – ZENA™

The ZENA™ tool is a graphical display of IEEE 802.15.4™ network protocols. In conjunction with the software, the ZENA analyzer can graphically display graphical representations of network messages as the information can be analyzed. Debugging the ZENA analyzer is like using an oscilloscope. If you are a ZigBee or the Microchip essential developer.
