

### Features

- On chip Hall sensor
- Rotor-locked shutdown
- Automatically restart
- Rotor-state detection (RD) output
- Built-in Zener protection for output driver
- Operating voltage: 3.8V~20 V
- Output current:  $I_{O(AVE)} = 500\text{mA}$  for SOT89-5L
- Lead Free Package: SOT89-5L
- Lead Free Finish/RoHS Compliant (Note 1)

### General Description

AH286 is a monolithic fan motor controller with Hall sensor's capability. It contains two complementary open-drain transistors for motor's coil driving, automatic lock current shutdown, and recovery protections. In addition, rotor-state detection (RD) output is for Rotor-state detection.

Rotor-lock shutdown detection circuit turns off the output driver when the rotor is blocked to avoid coil overheat. Then, the automatic recovery circuit will restart the motor. These protected actions are repeated and periodic during the blocked period. Until the blocking is removed, the motor recovers and runs normally.

### Ordering Information

| Device      | Package Code | Packaging (Note 2) | 13" Tape and Reel |                    |
|-------------|--------------|--------------------|-------------------|--------------------|
|             |              |                    | Quantity          | Part Number Suffix |
| AH286-YL-13 | Y            | SOT89-5L           | 2500/Tape & Reel  | -13                |

Notes: 1. EU Directive 2002/95/EC (RoHS). All applicable RoHS exemptions applied, see *EU Directive 2002/95/EC Annex Notes*.  
2. Pad layout as shown on Diodes Inc. suggested pad layout document AP02001, which can be found on our website at <http://www.diodes.com/datasheets/ap02001.pdf>.

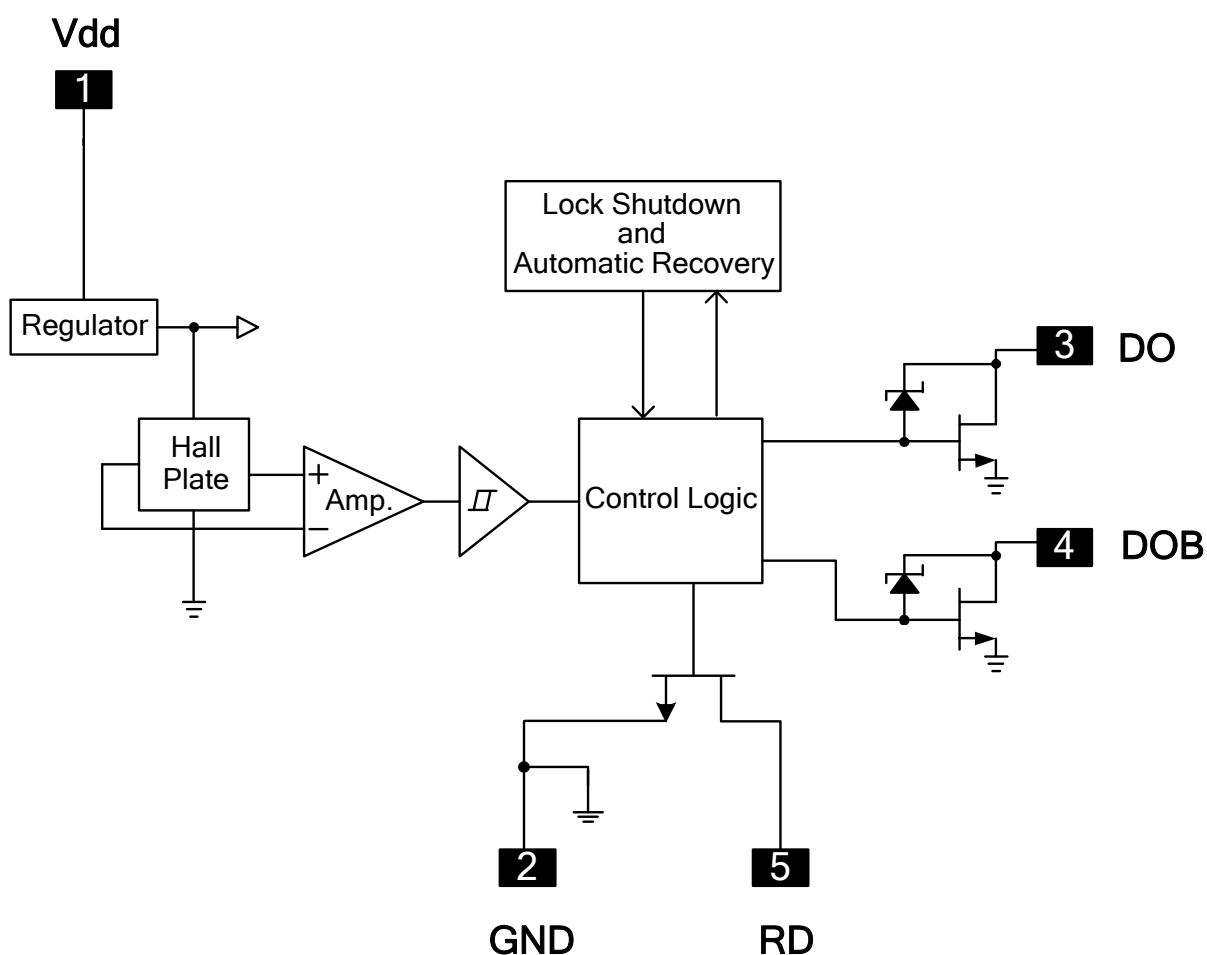

### Pin Assignment

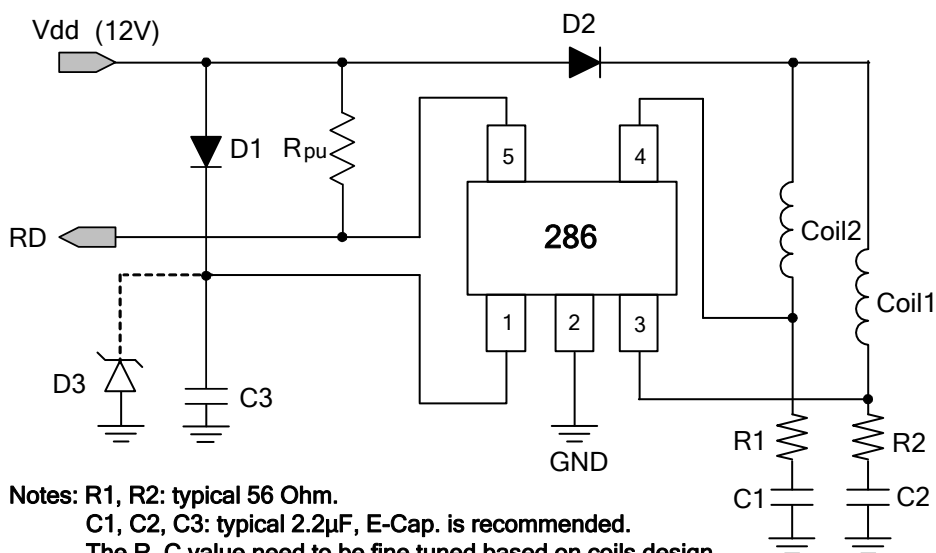

## Pin Descriptions

| Symbol | Description           |
|--------|-----------------------|
| RD     | Rotor-state detection |
| Vdd    | Input power           |
| DO     | Output pin            |
| DOB    | Output pin            |
| GND    | Ground                |

## Block Diagram

## Typical Application Circuit

12V DC Brush-Less Fan with RD Output Function

## Absolute Maximum Ratings $(T_A = 25^\circ\text{C})$

| Symbol                 | Characteristics                     |               | Rating    | Unit               |
|------------------------|-------------------------------------|---------------|-----------|--------------------|
| $V_{dd}$               | Supply Voltage                      |               | 24        | V                  |
| $I_{O(AVE)}$           | Output Current                      | SOT89-5L      | 500       | mA                 |
| $I_{O(PEAK)}$          |                                     | $I_{O(PEAK)}$ | 700       |                    |
| $P_D$                  | Power Dissipation                   | SOT89-5L      | 800       | mW                 |
| $T_{OP}$               | Operating Temperature               |               | -40 ~ 100 | $^\circ\text{C}$   |
| $T_{ST}$               | Storage Temperature                 |               | -55 ~ 150 | $^\circ\text{C}$   |
| $T_J$                  | Maximum Junction Temperature        |               | 150       | $^\circ\text{C}$   |
| $\theta_{JA}$ (Note 3) | Thermal Resistance Junction-to-Case | SOT89-5L      | 156       | $^\circ\text{C/W}$ |

Notes: 3.  $\theta_{JA}$  should be confirmed with what heat sink thermal resistance. If no heat sink contacting,  $\theta_{JA}$  is almost the same as  $\theta_{JC}$ .

### Electrical Characteristics (T<sub>A</sub> = 25 °C, V<sub>dd</sub>=12V, unless otherwise specified)

| Symbol                | Characteristics                | Conditions            | Min | Typ.  | Max  | Unit |
|-----------------------|--------------------------------|-----------------------|-----|-------|------|------|
| V <sub>dd</sub>       | Supply Voltage                 | Operating             | 3.8 | -     | 20   | V    |
| I <sub>dd</sub>       | Supply current                 | Operating             | -   | 2.0   | 4.0  | mA   |
